

SARAVANAN S B

+91-9361619147 | Tiruppur, Tamil Nadu | balusaravanabalu@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Frontend developer with hands-on experience building responsive, data-driven web applications using React.js, React Router, and TanStack React Query. Skilled in translating UI/UX designs into reusable components, integrating REST APIs, and managing application state using Context. Currently a Frontend Developer Intern, with additional experience shipping an AI-powered developer tool. Seeking to contribute to teams building React-based, data-intensive front-end applications.

SKILLS

Languages & Core JavaScript, Python, HTML5, CSS3
Frontend Frameworks & Libraries React.js (React 19), React Router DOM, Tailwind CSS
State Management Redux, Context API
Data Fetching & Caching TanStack React Query, Axios, REST API Integration
Build Tools & Practices Git, GitHub, GitLab, PostMan, Vercel, Netlify

EXPERIENCE

Frontend Developer Intern Feb 2026 – May 2026
Hazhtech, Tiruppur

- Built and maintained responsive UI components using React.js, Tailwind CSS, and JavaScript, ensuring cross-browser compatibility and consistent user experience across devices.
- Optimized front-end performance and load times through code-splitting and lazy loading, improving page responsiveness and accessibility.
- Integrated REST APIs and managed application state to deliver seamless, data-driven interfaces, collaborating closely with backend developers.

PROJECTS

Insight X Dashboard – Data Visualization Dashboard [InsightX App](#) — [GitHub](#)
(React 19, MUI v5, React Router DOM, Zustand, TanStack React Query, Axios, Plotly.js)

- Built an interactive data visualization dashboard in React 19 and MUI v5, rendering dynamic Plotly.js charts across multiple data views with fully responsive layouts.
- Implemented client-side routing with React Router DOM and centralized global state using Zustand, reducing prop drilling and improving component reusability.
- Integrated REST APIs via Axios and TanStack React Query, using query caching to cut redundant network requests.
- Applied component memoization and code-splitting to optimize rendering performance across data-heavy views.

AI-Powered Arduino Compiler – Final Year Project (Node.js, Gemini API, HTML5, CSS3, JavaScript, Arduino CLI)

- Co-developed an AI-assisted Arduino compiler with a Node.js backend integrating the API to deliver real-time syntax, logic, and performance error detection with automated correction suggestions.
- Built an interactive, responsive code editor frontend using HTML, CSS, and JavaScript with real-time syntax highlighting, visual error feedback, and one-click AI-suggested fixes.
- Achieved 93–96% error detection accuracy across four tested project types, cutting average debugging time by approximately 50% compared with standard Arduino IDE workflows.

Personal Portfolio Website (React.js, Tailwind CSS, HTML5, CSS3, JavaScript)

- Designed and built a fully responsive personal portfolio using React.js and Tailwind CSS to showcase projects, skills, and experience.

ADDITIONAL INFORMATION

- **Certifications:** Frontend Development.
- **Activities:** Paper Presentation at KPR Institution of Engineering and Technology; Paper Presentation at Kongu Engineering College.
- **Volunteering:** Executive Member, Student Association of ECE (CENIREA) – 2 years.
- **Languages:** English, Tamil.

EDUCATION

B.E. Electronics and Communication Engineering	2022 – 2026
Velalar College of Engineering and Technology	CGPA: 7.19 / 10
Higher Secondary Certificate (HSC)	2022
AVP Matriculation Higher Secondary School	Percentage: 72%
Secondary School Leaving Certificate (SSLC)	2020
Infant Jesus Matriculation Higher Secondary School	Percentage: 60.4%
